

Broxap wishes to strengthen its Estimating team to support the in-house manufacture of its stainless steel balustrade facility and the light to medium mild steel structures' division with the appointment of:

Fabrication Estimators (two posts)

With a proven fabrication background and experience and knowledge of the manufacturing processes and techniques involved (welding, rolling, etc) you will:

- ◆ Possess the ability to read technical drawings and detail the necessary material requirements (with and without the aid of BOQs) working within the project specification perimeters.
- ◆ Have the ability to analyse costs and value engineer components in line with project budget restraints.
- ◆ Have the ability to question costs of bought in items and have strong commercial awareness of current market costs.
- ◆ Locate specialist supplied products and obtain quotations.
- ◆ Contact and liaise with customers to establish budgets and true scope of works that require estimating.
- ◆ Have an excellent telephone manner and competent computer skills with a working knowledge of Excel and Word.

Applications from time served experienced fabricators, with estimating experience would be particularly welcomed.
