

Timber Bins: Fixings

Bolt Down Fixing:

Manufactured with four predrilled holes, Broxap's litter bins can be fixed in place using a "bolt down" method. These predrilled holes, which can be found in the base of the litter bin, allow the product to be securely fixed to a concrete base with four M10 x 120 raw bolts.

L Bracket Bolt Down Fixing:

Specific to the timber Oakhampton litter bin, Broxap supply four "L" shaped brackets fitted to the inside legs which are used to secure the litter bin onto a concrete base using four M10x120 fixing bolts.
