

Slat options

Timber slats

Most Cast Iron / Steel and Timber seats are supplied with Hardwood Iroko slats as standard.

Iroko is an extremely durable hardwood which is sourced from well established producers who have policies of sustainable forestry management.

Slats on this range of seats are supplied in a planed and sanded finish.

Steel slats

Various seats may be offered with steel slats as an option. All steel slats are galvanized to BS EN ISO 1461:1999 and provide increased integrity in areas of potential vandalism.

Recycled plastic slats

Seats may also be supplied with ecologically attractive recycled plastic slats. This option provides a virtually maintenance free slat option which is completely weatherproof and is therefore ideal for exposed situations. Recycled plastic slats may also incorporate engraved commemorative plaques.
