## Product Information

This large capacity cycle hub marries a modern aesthetic with a range of security features including but not limited to: swipe card access and automatic high security glass doors. The initial concept of this design came from a design and build project we worked on with Transport for Greater Manchester (TfGM) and Aedas Architects. They required state of the art secure cycle storage for various locations within Greater Manchester; the hubs installed for TfGM had provision for in excess of 45 cycles parked and were complete with integral helmet lockers in order to cater for short distance commuters.

## Features
