

# ECO-2TIER

economy two tier cycle parking

# EASI-RISER

gas assisted two tier cycle parking

## Mechanism

Manual lift

Gas strut lift assist mechanism

Cost Saving Option

Best Seller

## Convenience

User lifting/lowering of upper tier

Reduced lifting/lowering weights

The spaces on the upper rack are gravity and user operated. Once lowered down bikes can be easily rolled in to/out of the troughs.

The system is designed to reduce the physical effort needed by a user when lifting and/or lowering bikes into the upper tier.

## Guide Price

£125 per bike space

£140 per bike space

## Lower Storage Options

1) Sheffield Toast-rack (standard)

1) Sheffield Toast-rack (standard)

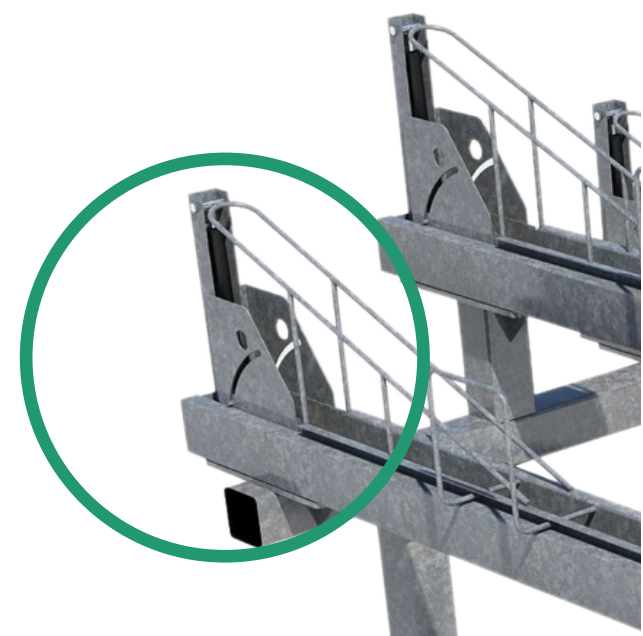

2) Hi-Lo wheel trough system (premium)

2) Hi-Lo wheel trough system (premium)

Note: Sheffield stands in the lower tier may be spaced (or gaps left) to allow for adaptive cycle parking or cargo bike spaces.

Note: Sheffield stands in the lower tier may be spaced (or gaps left) to allow for adaptive cycle parking or cargo bike spaces.

## Visual difference(s)

## Suitable for

Push bikes only (not e-bikes, due to weight of motors/batteries etc.)

Virtually all push bikes, including e-bikes up to 30 kg.

## Design tested

N/A

Gas cylinder tested up to 20,000 operations
