

## Crane Shade Sail

### BXTS/CRA

The Crane is a waterproof shade sail based on our more conservative Cairns design, but with a drastic change.

We have designed this structure with all of the primary supports on the outside of the tensile material. Its 3-column cantilever design makes it ideal for use as an entrance canopy to buildings. This gives an exceptionally chic design, which really highlights the shade sail as key design piece. It's 3-column cantilever design makes it ideal for use as an entrance canopy to buildings.

---
